Gauge Hatches

ACCESS & MONITORING

Provide sealed access for tank gauging and instrumentation while maintaining a vapor-tight seal.

Overview

Gauge hatches provide a dedicated, sealed access point on the tank roof for gauging equipment and instrumentation — automatic tank gauges, temperature sensors, or manual gauging tape — while keeping the vapour space sealed from atmosphere when not in use.

How It Works

A hinged, gasketed cover seals the hatch opening under a spring or bolted closure. Lifting the cover exposes the gauging aperture for instrument access or manual measurement, then the cover reseats to restore the vapour-tight seal.

Key Features

- Vapour-tight closure with gasketed seal
- Instrumentation-ready mounting for ATG equipment
- Easy one-hand manual operation
- Weatherproof cover construction

Typical Applications

- Automatic tank gauge (ATG) instrument mounting
- Manual gauging and temperature measurement access
- New builds and retrofits on floating- or fixed-roof tanks

WHY PRECON

Built for the demands of the global process industry.

Since 1975

Five decades engineering tank safety equipment

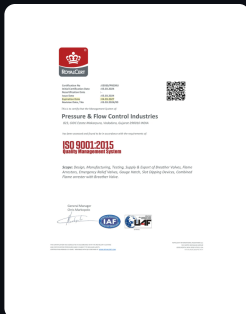

400+ Customers

Served across India and international markets

ISO Certified

9001 · 14001 · 45001 quality & safety systems
